Cybertheology-Antonio Spadaro 2014-09-19
Because the Internet has changed and is changing the ways in which we think and act, it must also be changing the ways in which we think Christianity and its theology. Cybertheology is the first book to explore this process from a Catholic point of view. Drawing on the theoretical work of authors such as Marshall McLuhan, Peter Levy, and Teilhard de Chardin, it questions how technologies redefine not only the ways in which we do things but also our being and therefore the way we perceive reality, the world, others, and God. “Does the
digital revolution affect faith in any sense?” Spadaro asks. His answer is an emphatic Yes. But how, then, are we to live well in the age of the Internet? Spadaro delves deeply into various dimensions of the impact of the Net on the Church and its organization, on our understanding of revelation, grace, liturgy, the sacraments, and other classical theological themes. He rightly points out that the digital environment is not merely an external instrument that facilitates human communication or a purely virtual world, but part of the daily experience of many people, a new “anthropological space” that is reshaping the way we think, know, and express ourselves. Naturally, this calls for a new understanding of faith so that it makes sense to people who live and work in the digital media environment. In developing the notion of cybertheology, Spadaro seeks to propose an intelligence of faith (intellectus fidei) in the era of the Internet. The book’s chapters include reflections on man the decoder and the search engines of God, networked existence and the mystical body, hacker ethics and Christian vision, sacraments and “virtual presence,” and the theological challenges of collective intelligence.

Cybertheology-Antonio Spadaro 2014 This book, written by Antonio Spadaro, S.J., the Editor of La Civiltà Cattolica, has been translated by Maria Way, who specializes in topics relating to media and religion. The author suggests that since the Internet has changed, and is changing, the ways in which we think and act, it must also be changing the ways in which we think Christianity and its theology. To develop this theme, he uses the term 'Cybertheology'. Through the theoretical works of a variety of authors, e.g., Marshall McLuhan, Peter Lévy and Teilhard de Chardin, he associates the concepts of theology with theories that have been expounded on the internet. His sources come from media studies and anthropology, as well as theology. Spadaro also considers the hacker ethic in relation to Cybertheology. How has the internet changed our notion of theology? Has the internet had similar effects on the thinking of Christianity that were experienced after the development of other media technologies? The book aims to clarify just
how thinking has changed or remained the same in an era which is often seen as one in which the media's changes have speeded up. It considers both the positives and negatives that may be associated with the internet in relation to Christianity and its theology. Teaching Theology in a Technological Age-Yvette Debergue 2015-11-25 The iGeneration has learned to adapt rapidly to technological change. Tech-savvy students multi-task with consummate ease, accessing email on smart-phones, researching assignments on tablets, reading a book on Kindle, while drinking a flat white and listening to iTunes in the background. How does the tertiary educational curriculum meet the learning needs of students whose attention transitions rapidly between mediums and messages? The complexity and pace of modern technological change has left the theological educational sector gasping, as it struggles to devise pedagogically engaging online distance learning materials in traditional disciplines and teach units with significant relational and pastoral components. The technological benefits are vast, the instant availability of information unprecedented, and the opportunities to provide theological education to groups marginalised by the tyranny of distance and time enormous. How should the theological sector address these challenges and opportunities? Although the benefits are massive, the media is replete with stories of the casualties of technological change, including cyber-bullying, internet predators, the psychic damage from trolls, addiction to gaming, and issues of body image, among others. How should the theological sector, drawing upon its scriptural and teaching heritage, come to grips with the deficits spawned by the technological revolution? What is the theological, pastoral, social and pedagogic responsibility of theology teachers in nurturing this new generation? Teaching Theology in a Technological Age draws together in an inspiring volume a series of cutting-edge essays from Australian, New Zealand and South African scholars on the learning and teaching of theology in a digital age. Reformed Theology-Wallace M. Alston 2003 Christian theology, classically defined, is faith's
intellectual work of seeking understanding, not in order to prove its truth but to persuade those who hear it proclaimed. Theology done from within the Reformed tradition has long displayed this quality, and it continues to develop in response to our changing world. "Reformed Theology: Identity and Ecumenicity" is an excellent resource for readers interested in examining current trends and motifs in Reformed thought. Written by systematic theologians from around the world, this book explores the meaning of the Reformed tradition and its relevance for the contemporary church. The contributors highlight ways that Reformed theology can enrich the church ecumenical even as they seek to realize a more catholic Reformed community of inquiry. Contributors: P. The Cyberdimension-Eric Trozzo 2019-04-29 In 2013, Edward Snowden released a trove of documents revealing the extent of government electronic surveillance. Since then, we have been inundated with reports of vicious malware attacks, election hacking, data breaches, potential cyberwars, fights over Net Neutrality, and fake internet news. Where once discussion of cyberspace was full of hope of incredible potential benefits for humanity and global connection, it has become the domain of fear, anxiety, conflict, and authoritarian impulses. As the cloud of the Net darkens into a storm, are there insights from Christian theology about our online existence? Is the divine present in this phenomenon known as cyberspace? Is it a realm of fear or a realm of hope? In The Cyberdimension, Eric Trozzo engages these
questions, seeking not only a theological means of speaking about cyberspace in its ambiguity, but also how the spiritual dimension of life provokes resistance to the reduction of life to what can be calculated. Rather than focusing on the content available online, he looks to the structure of cyberspace itself to find a chastened yet still expectant vision of divinity amidst the political, economic, and social forces at play in the cyber realm.

Theology and Civil Society-Charles Pemberton 2017-10-23

From food banks to migrant welcome committees, and community organisers to internet based campaigners, civil society is central to the North Atlantic social landscape. Theology and Civil Society advances our understanding of what civil society is and offers a theologically informed re-imagining of our shared
social life. Prefaced by a foreword by the Rev. Dr Rowan Williams, this book explores contemporary manifestations of the kind of collective action observed in civil society since the 1800s. It then examines civil society as the sum of modern associations which mediate our relationships to the market and the state, but which cannot be identified fully with either the market or the state. Finally, three different perspectives on civil society are presented using insights from theologians such as John Milbank and Georg Hegel. This is a pertinent topic for contemporary society, and it is explored expertly here by an international panel of contributors. As such, it is an important volume for any scholar of Theology and Religious Studies and their interactions with Sociology and Politics.

Christians in an Age of Wealth-Craig L. Blomberg 2013-11-26 In this book, Craig Blomberg addresses the tough questions about the place and purpose of wealth and material possessions in a Christian’s life. He points to the goodness of wealth, as God originally designed it, but also surveys the Bible’s many warnings against making an idol out of money. So are material possessions a blessing for which we should long? And what are the dangers that the use or abuse of material possessions can produce? Blomberg expounds upon how the sharing of goods and possessions is the key safeguard against both greed and covetousness. He expands on the concept of giving generously, even sacrificially, to those who are needier, demonstrating how Christians can participate in God’s original good design for abundance and demonstrate the world-altering gospel of Christ. Is there any one key to keeping possessions in their proper, God-intended perspective? Are there limits on how rich we should become or on how poor we should allow others to get? What does a truly Christian economic system look like? How does the Bible’s teaching on wealth fit into the gospel?

Cyber Worship in Multifaith Perspectives-Mohamed Taher 2006 Cyber Worship in Multifaith Perspectives, as is implied by its name, explores worship (i.e., Prayer, Praise, Scripture, Sacrament, Rituals, Confessions, Eucharist, Rites, Pilgrimages, Reflection, Contemplation, etc.) on the Internet. It is not an "everything you need to know" guide about the subjects of faith and belief, religions-online, religions on the Net, or religions in cyberspace. Rather, it is a book about religious and spiritual experience under the rubric, cyber worship, which is the variety of ways religious devotion is performed and carried out on the Internet. The term 'Cyber Worship' is a catchall phrase, which includes variants such as online worship, virtual worship, electronic prayer, cyber puja, cyber synagogue, and so on. Dr. Mohamed Taher has thus assembled a quick reference for two groups: those communities that are involved in Cyber Worship and business Webs that collaborate in sustaining wired environments. As such, this book provides an interesting and current perspective on a practice that will continue to grow in the future.

The Problem of Perception and the Experience of God-Sameer Yadav 2015-06-01 Sameer Yadav's central claim in this work is that there is a radical mistake in many contemporary accounts that require grounding a theological story of God's availability to us in experience in a prior general philosophical theory of perception. Instead, it is argued that the philosophical problem of perception is a pseudoproblem. The study concludes with a new reading of Gregory of Nyssa and his theology of the spiritual senses, which is free from the bewitchment of the problem of perception.

Cyborg Theology-Scott A. Midson 2017-10-30 In particular, Donna Haraway argued in her famous 1991 'Cyborg Manifesto' that people, since they are so often now detached and separated from nature, have themselves evolved into cyborgs. This striking idea has had considerable influence within critical theory, cultural studies and even science fiction (where it has surfaced, for example, in the Terminator films and in the Borg of the Star Trek franchise). But it is a notion that has had much less currency in theology. In his innovative new book, Scott Midson boldly argues that the deeper nuances of Haraway’s and the cyborg idea can similarly rejuvenate theology, mythology and anthropology. Challenging the damaging anthropocentrism directed towards nature and the non-human in our society, the author reveals - through an imaginative reading of the myth of Eden - how it is now possible for humanity to be at one with the natural world even as it vigorously pursues novel, 'post-human', technologies.

In Your Eyes I See My Words—Pope Francis

2019-09-24

An extraordinary opportunity to understand the vision of Pope Francis. Pope Francis is a first in many ways: the first pope from the Americas, the first Jesuit, the first Francis, the first child of immigrants from the Old World, nurtured and transformed by the New World, and returned to lead the whole world. His eloquent homilies and speeches have inspired the faithful of Argentina for decades, largely through his gift of oratory, tracing back to his time as a bishop, archbishop, and cardinal in his home country. Published in English for the first time in their entirety and with contextual annotations, In Your Eyes I See My Words, Volume 1 collects his homilies and speeches from 1999 to 2004.

Volume 2 spans from 2005 to 2008, and Volume 3, from 2009 to 2013, concludes with his prophetic last homily before his election to the papacy. This illuminating collection presents an extraordinary opportunity to understand the vision of a great pastor. His words bear witness to the deep experience of faith among God’s people while also showcasing his own extraordinary ability to connect with communities of faith. Through these homilies and speeches, Pope Francis humbly displays his abilities as a wordsmith, a patient and attentive teacher, an inspired and faithful theologian, and a sensitive pastor uniquely attuned to his people, offering ready guidance for their journeys, but also journeying with them. The first of a three-volume translation of Pope Francis’s theological, pastoral, anthropological, and educational thought provides rich insights into the mind and theological unfolding of a spiritual leader who has become beloved all across the globe. Within it we see Archbishop Jorge Mario Bergoglio—later Pope Francis—ministering to the needs of the people while also engaging with...
the political, technological, and societal forces affecting their daily lives. Here is an ecclesial voice not afraid to challenge the politicians, the culture-makers, and media moguls—even his own ordained and lay church ministers—to live a life of faithfulness marked by justice, equality, and concern for the needs of everyone, urging all to rely on the “vitality of memory” and the “recovery of hope.” In Your Eyes I See My Words also provides a glimpse into the political, social, and religious environment of Argentina and Latin America, providing a unique perspective on the issues confronting the faithful and how those issues motivated and nurtured Pope Francis’s understanding of the Church’s mission to all segments of society—particularly to those underrepresented and on the margins of history. Cybersemiotics-Søren Brier 2008 Cybersemiotics not only builds a bridge between science and culture, it provides a framework that encompasses them both. Militant Jihadism-Serafettin Pektas 2019-10-15 Scholarly analysis of evolving jihadist organisation, strategies, and operation Jihadist militants keep being a global threat. Many observers suggest that a transformation is likely to happen in their organisation, operation, mobilisation, and recruitment strategies, particularly after the territorial decline of the “Caliphate” of the “Islamic State.” This volume explores different aspects of the future trajectories of militant jihadism and the prospective transformation of this movement in and around Europe. The authors analyse the changing jihadist landscape and networks, and the societal challenges posed by both returned foreign terrorist fighters and those who have not returned to their countries of origin. Other topics of discussion are cyber jihadism, jihadist financing, women's position in and relevance for contemporary jihadism, the role of prisons in relation to radicalisation and militancy, and the changing theological dynamics. Based on recent empirical research, Militant Jihadism offers a solid scholarly contribution to various disciplines that study violence, terrorism, security, and extremism.

The Cyber Risk Handbook-Domenic Antonucci
2017-05 Actionable guidance and expert perspective for real-world cybersecurity The Cyber Risk Handbook is the practitioner's guide to implementing, measuring and improving the counter-cyber capabilities of the modern enterprise. The first resource of its kind, this book provides authoritative guidance for real-world situations, and cross-functional solutions for enterprise-wide improvement. Beginning with an overview of counter-cyber evolution, the discussion quickly turns practical with design and implementation guidance for the range of capabilities expected of a robust cyber risk management system that is integrated with the enterprise risk management (ERM) system. Expert contributors from around the globe weigh in on specialized topics with tools and techniques to help any type or size of organization create a robust system tailored to its needs. Chapter summaries of required capabilities are aggregated to provide a new cyber risk maturity model used to benchmark capabilities and to road-map gap-improvement. Cyber risk is a fast-growing enterprise risk, not just an IT risk. Yet seldom is guidance provided as to what this means. This book is the first to tackle in detail those enterprise-wide capabilities expected by Board, CEO and Internal Audit, of the diverse executive management functions that need to team up with the Information Security function in order to provide integrated solutions. Learn how cyber risk management can be integrated to better protect your enterprise Design and benchmark new and improved practical counter-cyber capabilities Examine planning and implementation approaches, models, methods, and more Adopt a new cyber risk maturity model tailored to your enterprise needs The need to manage cyber risk across the enterprise—inclusive of the IT operations—is a growing concern as massive data breaches make the news on an alarmingly frequent basis. With a cyber risk management system now a business-necessary requirement, practitioners need to assess the effectiveness of their current system, and measure its gap-improvement over time in response to a dynamic and fast-moving threat landscape. The Cyber Risk Handbook brings the
world's best thinking to bear on aligning that system to the enterprise and vice-a-versa. Every functional head of any organization must have a copy at-hand to understand their role in achieving that alignment.

Reading Minjung Theology in the Twenty-First Century-Yung Suk Kim 2013-09-16 This edited volume brings Ahn Byung-Mu's minjung theology into dialogue with twenty-first-century readers. Ahn Byung-Mu was one of the pioneers of Korean minjung theology. The centerpiece of his minjung theology is focused on the Greek word ochlos, understood as the divested, marginalized, powerless people. Part 1 introduces readers to his life and theological legacy. Part 2 includes four important writings of Ahn Byung-Mu: "Jesus and Minjung in the Gospel of Mark," "Minjung Theology in the Gospel of Mark," "The Transmitters of Jesus Event Tradition," and "Minjok, Minjung, and Church." Part 3 contains a collection of articles from international scholars who evaluate and engage Ahn's ochlos/minjung theology in their own fields and formulate critical readings of minjung theology. Responses include postcolonial, black theology, and feminist perspectives.

Islam in the Digital Age-Gary R. Bunt 2003-07-20 The Internet is very big in the Arab world. After Al-Jazeera, it is the second most important source of dissenting opinion. Literally, millions of people in the Muslim world rely on web-sites to get their information and fatwas. A whole new life of cyber Imams and a new culture is emerging through Internet programmes and will have a profound effect on Arab consciousness. This book documents all this and examines various sites and offers the first comprehensive analysis of the impact of the Internet on Islamic culture. Zia Sardar, author of Postmodernism and the Other and Why Do People Hate America The Internet is an increasingly important source of information for many people in the Muslim world. Many Muslims in majority and minority contexts rely on the Internet -- including websites and e-mail -- as a primary source of news, information and communication about Islam. As a result, a new media culture is emerging which is having a significant impact on areas of global Muslim
consciousness. Post-September 11th, this phenomenon has grown more rapidly than ever. Gary R. Bunt provides a fascinating account of the issues at stake, identifying two radical new concepts: Firstly, the emergence of e-jihad ('Electronic Jihad') originating from diverse Muslim perspectives -- this is described in its many forms relating to the different definitions of 'jihad', including on-line activism (ranging from promoting militaristic activities to hacking, to coordinating peaceful protests) and Muslim expression post 9/11. Secondly, he discusses religious authority on the Internet -- including the concept of on-line fatwas and their influence in diverse settings, and the complexities of conflicting notions of religious authority.

Professionalizing the Nation's Cybersecurity Workforce? - National Research Council 2013-10-01 Professionalizing the Nation's Cybersecurity Workforce? Criteria for Decision-Making considers approaches to increasing the professionalization of the nation's cybersecurity workforce. This report examines workforce requirements for cybersecurity and the segments and job functions in which professionalization is most needed; the role of assessment tools, certification, licensing, and other means for assessing and enhancing professionalization; and emerging approaches, such as performance-based measures. It also examines requirements for the federal (military and civilian) workforce, the private sector, and state and local government. The report focuses on three essential elements: (1) understanding the context for cybersecurity workforce development, (2) considering the relative advantages, disadvantages, and approaches to professionalizing the nation's cybersecurity workforce, and (3) setting forth criteria that can be used to identify which, if any, specialty areas
may require professionalization and set forth criteria for evaluating different approaches and tools for professionalization. Professionalizing the Nation's Cybersecurity Workforce? Criteria for Decision-Making characterizes the current landscape for cybersecurity workforce development and sets forth criteria that the federal agencies participating in the National Initiative for Cybersecurity Education—as well as organizations that employ cybersecurity workers—could use to identify which specialty areas may require professionalization and to evaluate different approaches and tools for professionalization.

Journal of Theology for Southern Africa- 2003 The New Testament in Its World-N. T. Wright 2019-11-19 Finally: an introduction that captures the excitement of the early Christians, helping today’s readers to think like a first-century believer while reading the text responsibly for today. The New Testament in Its World is your passageway from the twenty-first century to the era of Jesus and the first Christians. A highly-readable, one-volume introduction placing the entire New Testament and early Christianity in its original context, it is the only such work by distinguished scholar and author N. T. (Tom) Wright. An ideal guide for students, The New Testament in Its World addresses the many difficult questions faced by those studying early Christianity. Both large and small, these questions include: What is the purpose of the New Testament? What was the first-century understanding of the kingdom? What is the real meaning of the resurrection in its original context? What really were the Gospels? Who was Paul and why are his letters so controversial? As twenty-first-century people, how do we recover the excitement of what it was like to live as Christians in the first or second centuries? In short, The New Testament in Its World brings together decades of ground-breaking research, writing, and teaching into one volume that will open readers' eyes to the larger world of the New Testament. It presents the New Testament books as historical, literary, and social phenomena located in the world of Second Temple Judaism, amidst Greco-Roman politics and culture, and within early Christianity. Written for both
classroom and personal use, the benefits of The New Testament in Its World include: A distillation of the life work of N. T. Wright on the New Testament with input from Michael Bird. "The common thread running through the book is the organizing of civil society groups at the grassroots level, and how they are influencing certain segments of their respective countries, and even challenging state control and the monopoly of mainstream media." Asian Cyberactivism strives to examine political organising online in Asia even as the technology and the rules change. Activists provide their perspectives on how new media relates to democracy, and showcase examples that could be
emulated to further the cause of democracy.
"Expressions of free speech have blossomed with
the advent of new communications technologies
like the Internet, but with the Internet itself
becoming a target for censorship, regulation and
control, it remains to be seen if cyberactivists in
Asia will be able to overcome or bypass them."

Models of Contextual Theology-Stephen B.
Bevans 2002 Stephen B Bevans's Models of
Contextual Theology has become a staple in
courses on theological method and as a
handbook used by missioners and other
Christians concerned with the Christian
tradition's understanding of itself in relation to
culture. First published in 1992 and now in its seventh printing in English, with translations underway into Spanish, Korean, and Indonesian, Bevans's book is a judicious examination of what the terms "contextual theology" and "to contextualize" mean. In the revised and expanded edition, Bevans adds a "counter-cultural" model to the five presented in the first edition -- the translation, the anthropological, the praxis, the synthetic, and the transcendental model. This means that readers will be introduced to the way in which figures such as Stanley Hauerwas, John Milbank, Lesslie Newbigin, "and (occasionally) Pope John Paul II" need to be taken into account. The author's revisions also incorporate suggestions made by reviewers to enhance the clarity of the original three chapters on the nature of contextual theology and the five models.
