Educational Psychology-Paul D. Eggen 2013 Educational Psychology: Windows on Classrooms, Ninth Edition, will help you increase student learning and development. It is the most applied book in the field. If you're looking for a book that gives you a sound theoretical and research-based foundation and then provides specific and concrete illustrations and guidelines for applying this theory and research with your students, this is the book for you. The book uses an integrated-case approach. Each chapter begins with a case study taken from actual classroom practice. But, instead of stopping there, Eggen and Kauchak then weave the case throughout each chapter—extracting specific illustrations from it, and in some instances even taking dialogue from the lesson—to illustrate classroom applications of sometimes abstract and hard to understand theory and research.

Jurnal bahasa moden- 1983 Dari pedagogi ke politik-Abdul Saad 1982 Beyond Methods-D. Kumaravadivelu 2003 Publisher's description: In this original book, B. Kumaravadivelu presents a macrostrategic framework designed to help both beginning and experienced teachers develop a systematic, coherent, and personal theory of practice. His book provides the tools a teacher needs in order to self-observe, self-analyze, and self-evaluate his or her own teaching acts. The framework consists of ten macrostrategies based on current theoretical, empirical, and experiential knowledge of second language and foreign language teaching. These strategies enable teachers to evaluate classroom practices and to generate techniques and activities for realizing teaching goals. With checklists, surveys, projects, and reflective tasks to encourage critical thinking, the book is both practical and accessible. Teachers and future teachers, researchers, and teacher educators will find the volume indispensable.
